SẮC KÝ v2

CHECK-IN UI UPDATE SPECIFICATION v1.0

Visual implementation specification + Codex build contract
Approved desktop direction • 29/08/2026

Production	https://sacky-space.vercel.app
Vercel project	sacky-space
Repository	katherine205203/SacKySpace
Desktop priority	MacBook / 16:10 first
Visual language	Soft Editorial Color System

Authority: Check-in Product & UX Spec v1.0 + Sắc Ký UI System & Style Spec v1.0 + approved mockups in this pack.

0. Purpose

Tài liệu này nối ba nguồn thành một implementation contract duy nhất cho Codex: Check-in Product & UX Specification v1.0; Sắc Ký UI System & Style Specification v1.0; và bộ mockup desktop được duyệt ngày 29/08/2026.

- Product behavior và data semantics của Check-in Spec thắng mọi khác biệt về hình ảnh.
- UI System & Style Spec thắng legacy CSS hoặc screenshot cũ.
- Mockup là visual target về composition, density và component treatment; không được dùng để làm sai product rule.
- Không redesign Home trong task này, trừ shared primitive normalization mà không làm đổi approved appearance.

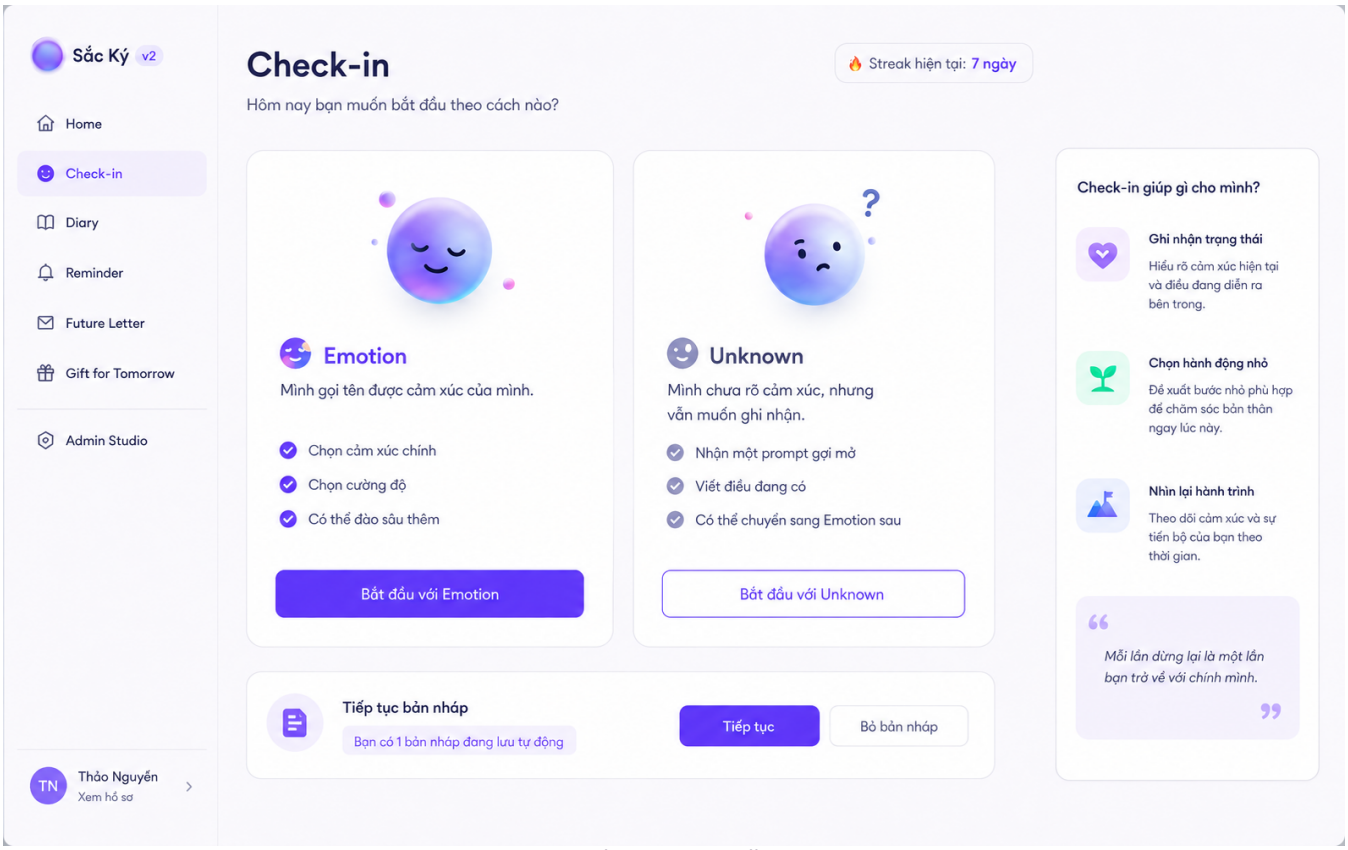

1. Visual Constitution

- Canvas #F8F6FF; Surface #FFFFFF; Ink #231B46; Muted #625A75.
- Accent violet #743CFF; Accent strong #5326BE; Accent soft #ECE4FF; Border #E5DDF5; Danger #FF5C70.
- Be Vietnam Pro; canonical weights 400 / 500 / 600 / 700.
- Desktop sidebar ~212px; global content max-width ~91–92rem; principal gap 16px.
- Standard surface radius 22px; compact card 16px; control 12px; standard padding 20–24px.
- Emotion color là content pigment, không phải app chrome.
- Standard primary CTA solid violet; không mặc định gradient.
- Không mascot/kawaii, infinite scroll, giant dashboard rectangle, glassmorphism phủ khắp, hoặc selected state chỉ dựa vào màu.

2. Shared component inventory

Primitive	Use
Surface / CompactCard	section, review, history, preview
Button	primary / secondary / ghost / danger
SegmentedControl / FilterChip	intensity, ranges, family filter
SelectionTile	emotion / need / context / action
Input / Textarea	search / note / custom action
Modal / Popover	decision, action, reflection, info
ColorOrb	summary + History aggregate
StepProgress / StickySummary	deepening flow

01. Landing

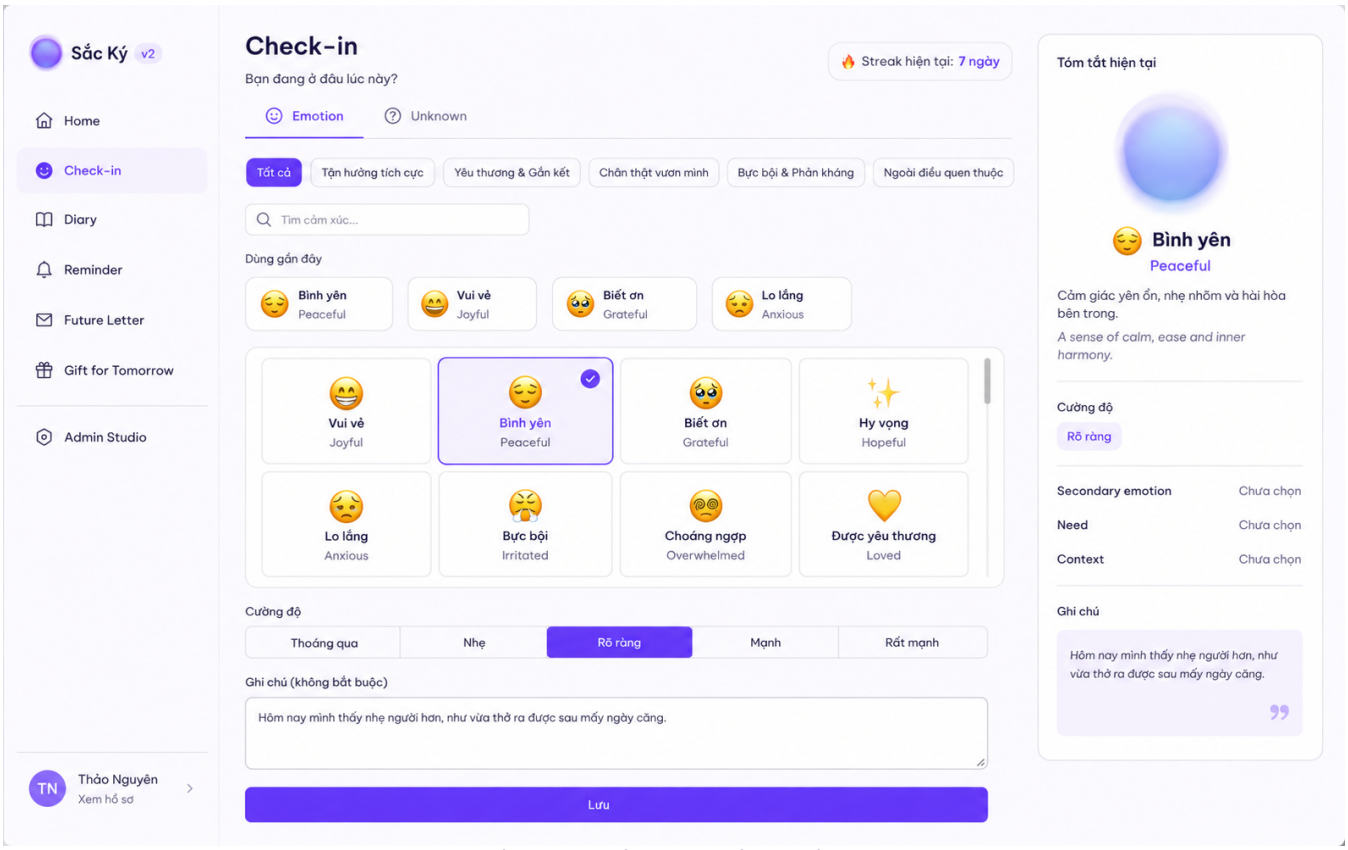

Mockup 01 — Landing

Implementation requirements

- Hero/header nhẹ; streak là continuity cue, không gamification.
- Hai mode Emotion/Unknown rõ ràng; Unknown không bị trình bày như lỗi.
- Draft resume strip nằm dưới mode cards khi có active draft.
- Orb/abstract pigment là visual anchor, không mascot.

02. Primary Emotion Workspace

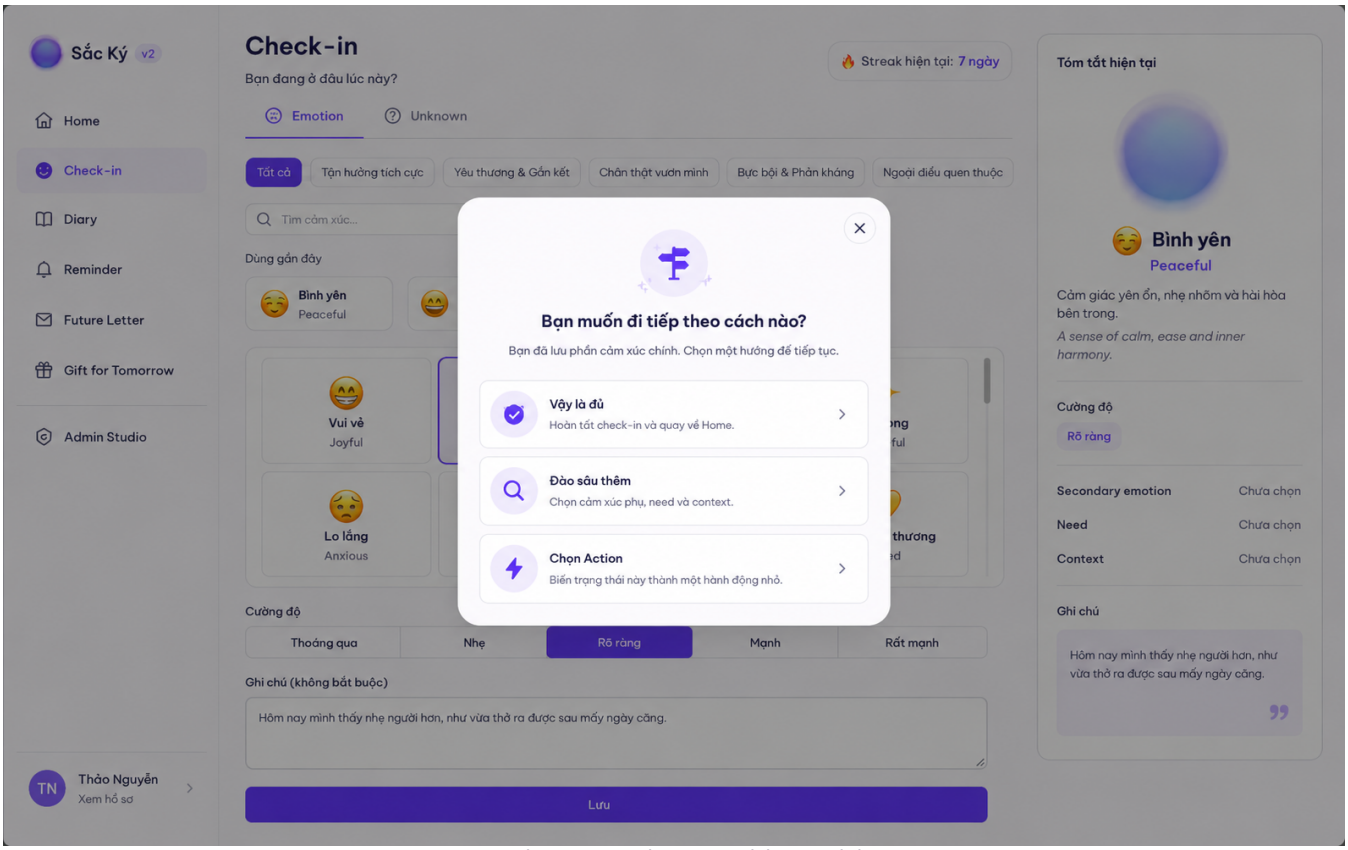

Mockup 02 — Primary Emotion Workspace

Implementation requirements

- Main workspace + sticky Summary sidebar.
- Family filter + search + Recent + bounded emotion collection.
- Primary chỉ 1; selected state outline + check + tint; item giữ nguyên vị trí.
- Intensity 5 mức bắt buộc; Note optional và persistent.
- Lưu active khi có Primary + Intensity.

03. Primary Decision Modal

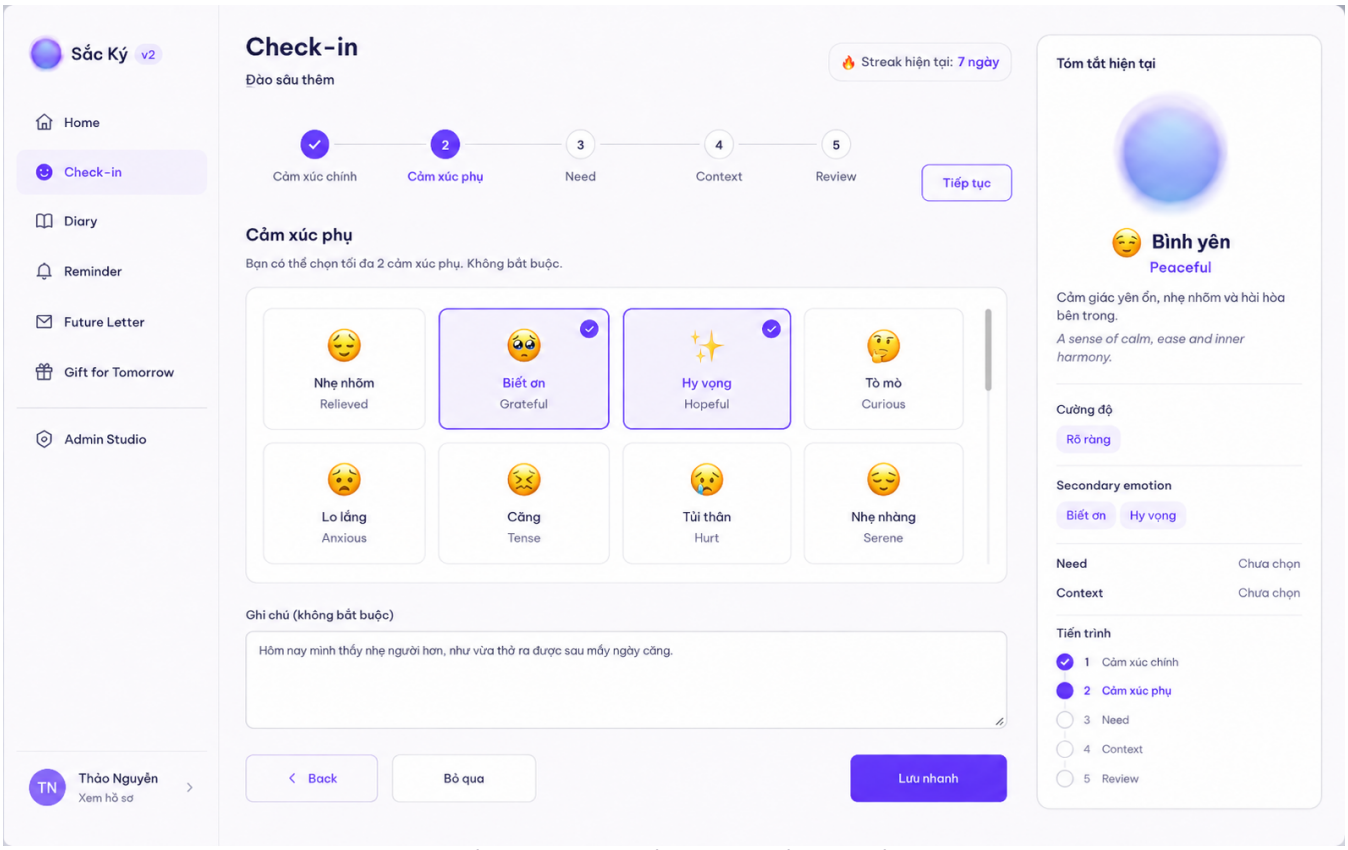

Mockup 03 — Primary Decision Modal

Implementation requirements

- Đúng 3 hướng: Vậy là đủ / Đào sâu thêm / Chọn Action.
- Primary Lưu chỉ mở modal; chưa completed.
- Close/cancel không auto-complete.
- Action modal replace decision layer, không modal stack sâu.

04. Deepening — Secondary Emotion

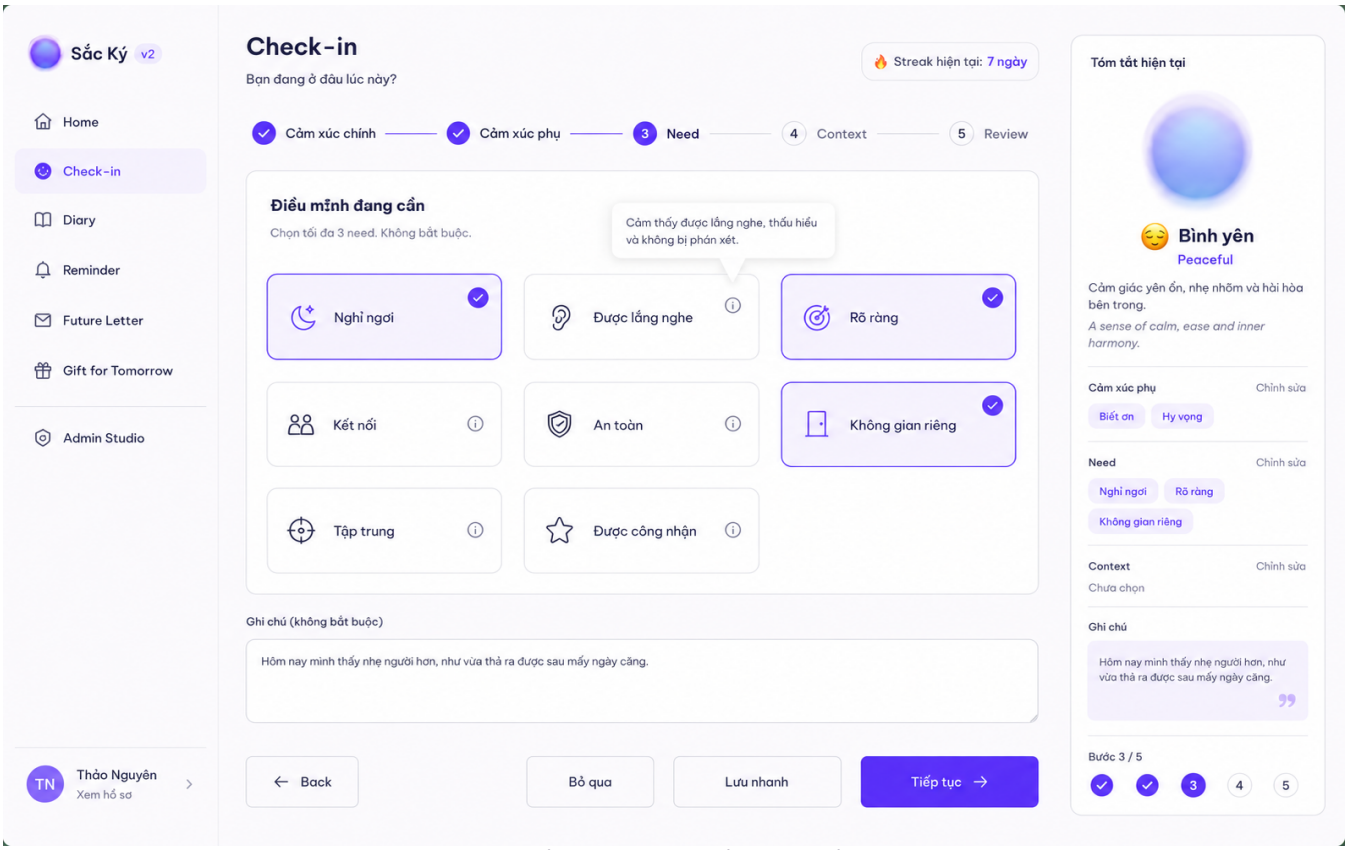

Mockup 04 — Deepening — Secondary Emotion

Implementation requirements

- Max 2; không trùng Primary, không duplicate; same family được phép.
- Bounded scroll; selected item không di chuyển.
- Note luôn visible và giữ nguyên.
- Back / Bỏ qua / Lưu nhanh / Tiếp tục.

05. Deepening — Need

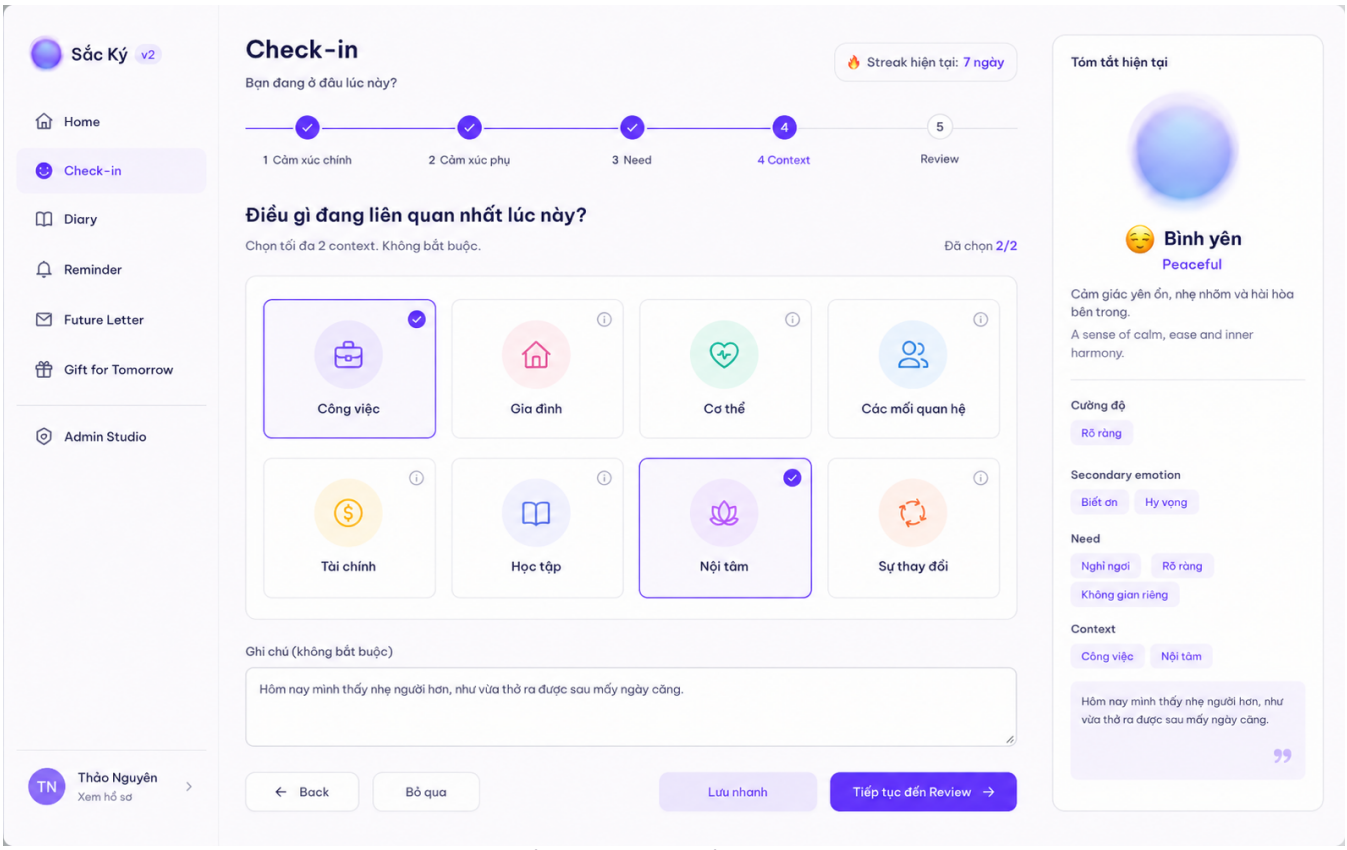

Mockup 05 — Deepening — Need

Implementation requirements

- Max 3; bounded scroll.
- Info affordance cho description; desktop hover/focus popover.
- Không silent replace khi đạt max.
- Summary rail đọc cùng draft object.

06. Deepening — Context

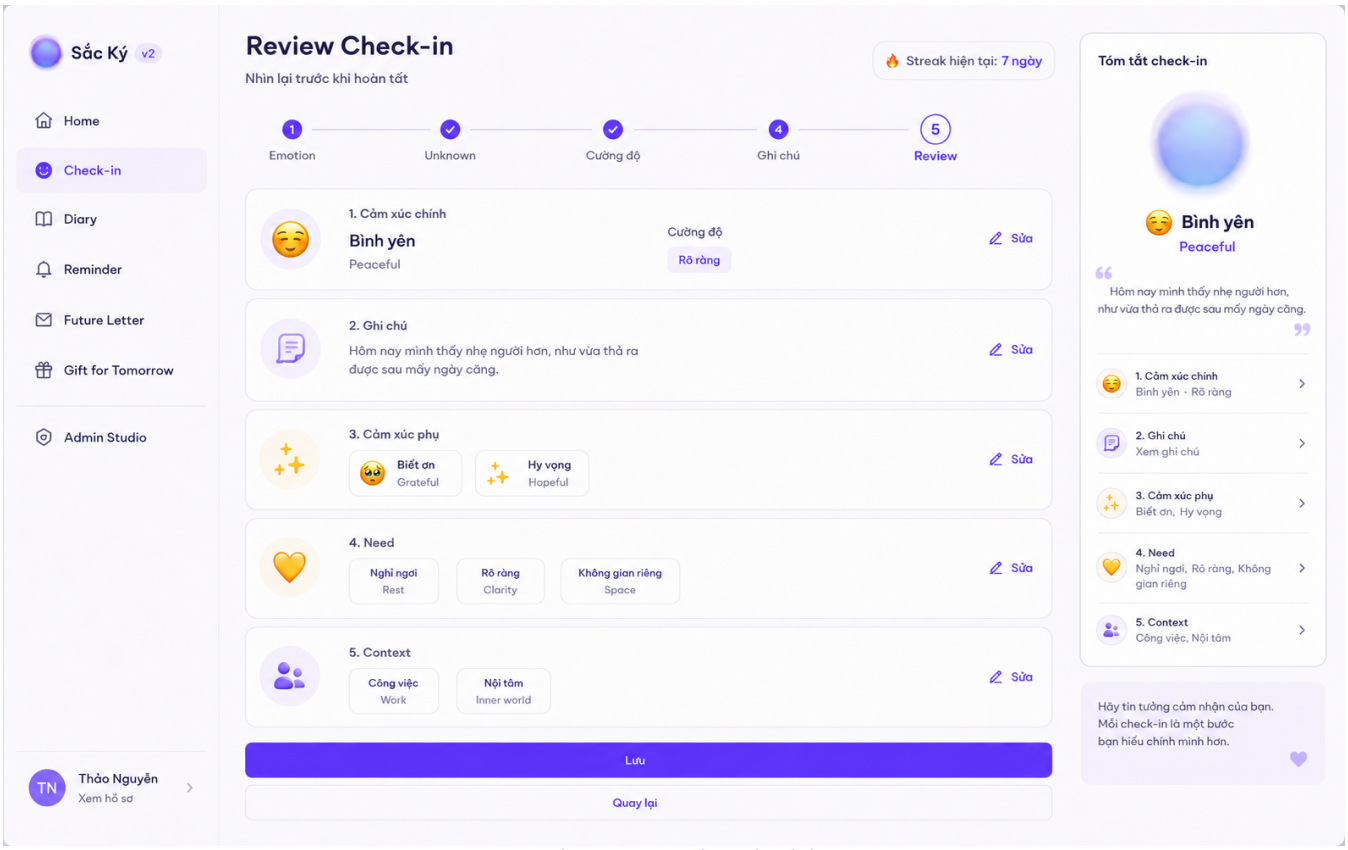

Mockup 06 — Deepening — Context

Implementation requirements

- Max 2; bounded selection.
- Cue rõ khi đạt 2/2.
- Giữ Primary/Secondary/Need/Note xuyên step.
- Tiếp tục đến Review; Skip vẫn hợp lệ.

07. Review Check-in

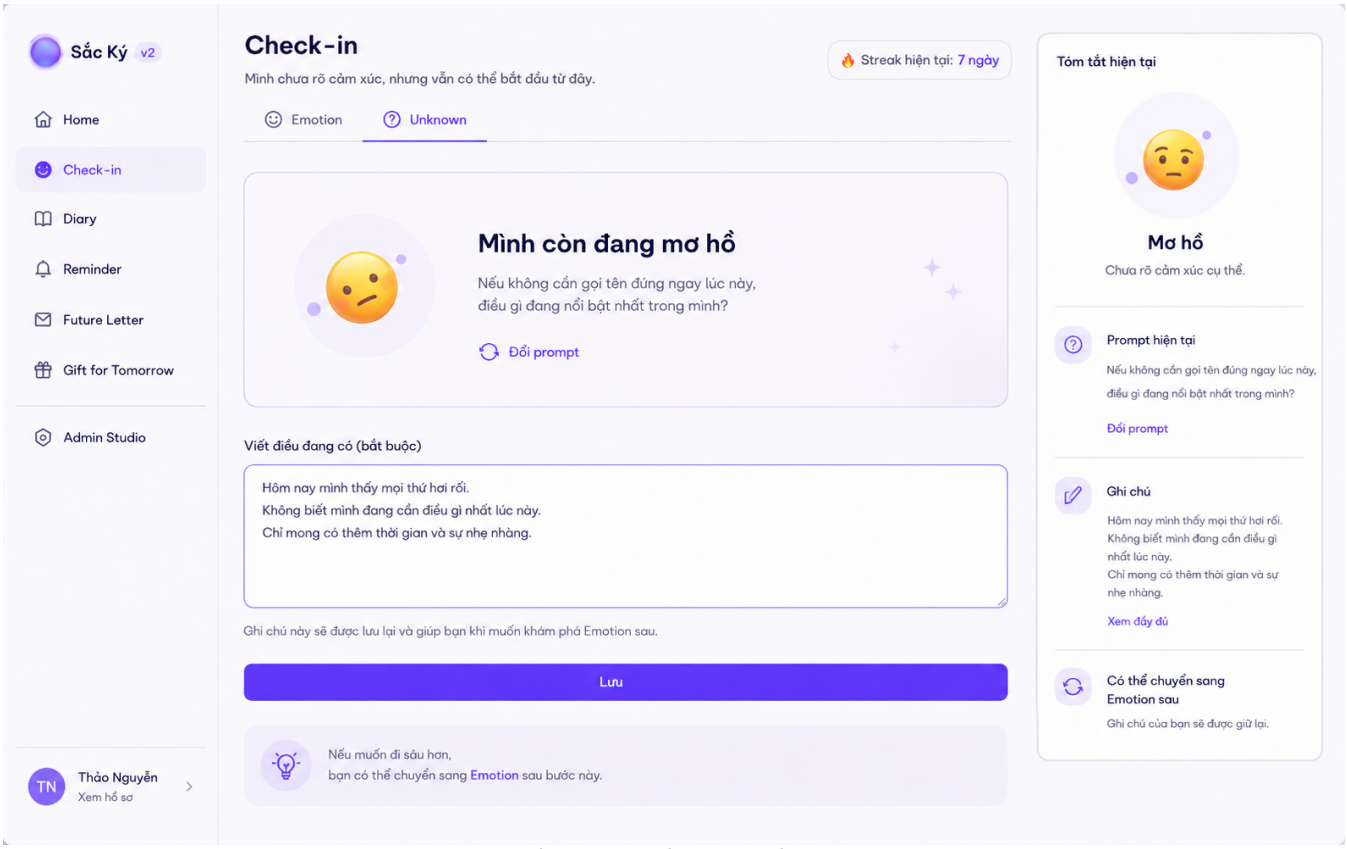

Mockup 07 — Review Check-in

Implementation requirements

- Hiển thị toàn bộ Primary, Intensity, Note, Secondary, Need, Context.
- Section có Sửa/Jump trực tiếp.
- Không Quick Save.
- Lưu chỉ mở Vậy là đủ / Chọn Action.

08. Unknown Workspace

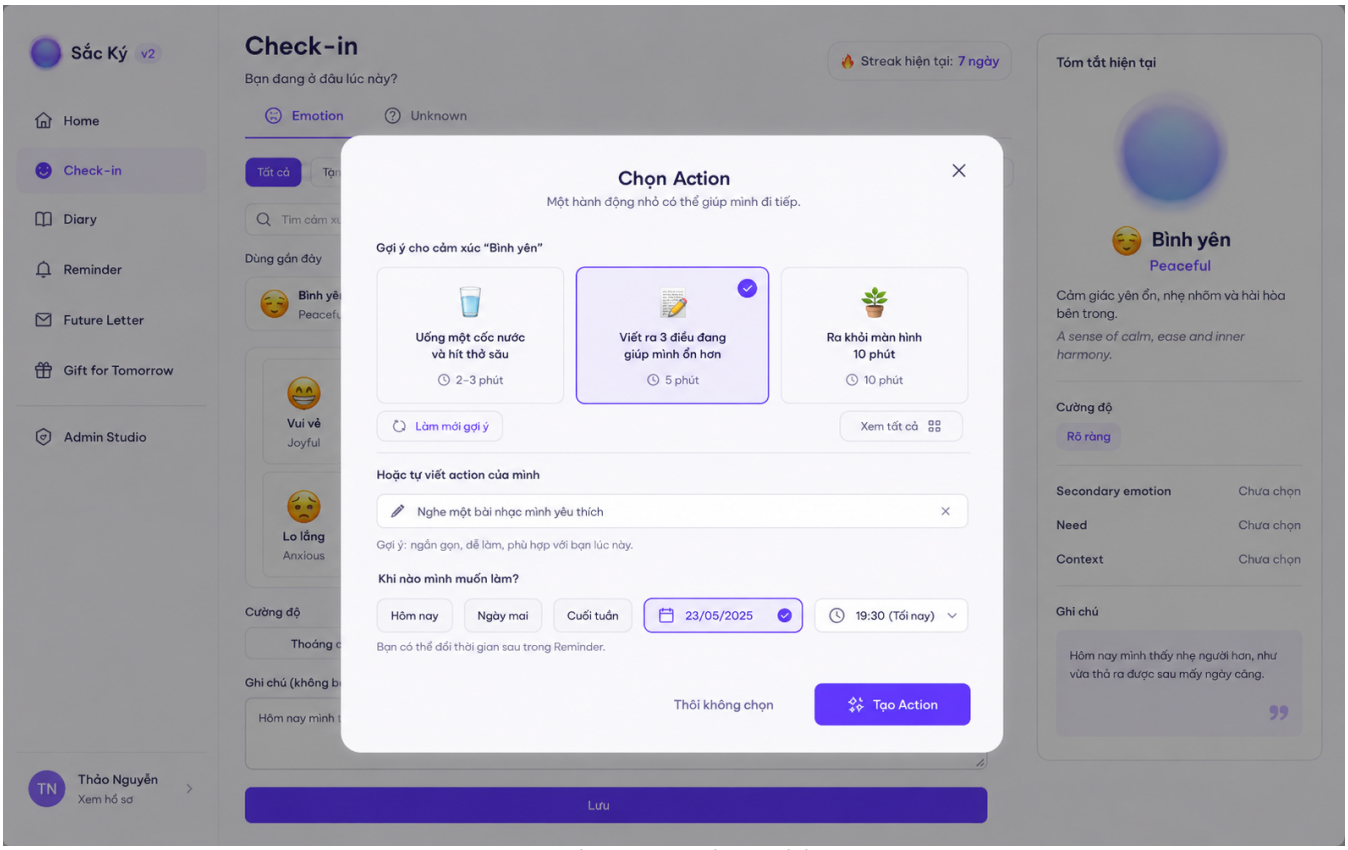

Mockup 08 — Unknown Workspace

Implementation requirements

- Random đúng 1 active prompt; có Đổi prompt.
- Note bắt buộc; đổi prompt không mất note; không intensity.
- Completed Unknown tính count + streak nhưng không Orb.
- Convert sang Emotion giữ prompt, note và provenance.

09. Action Modal

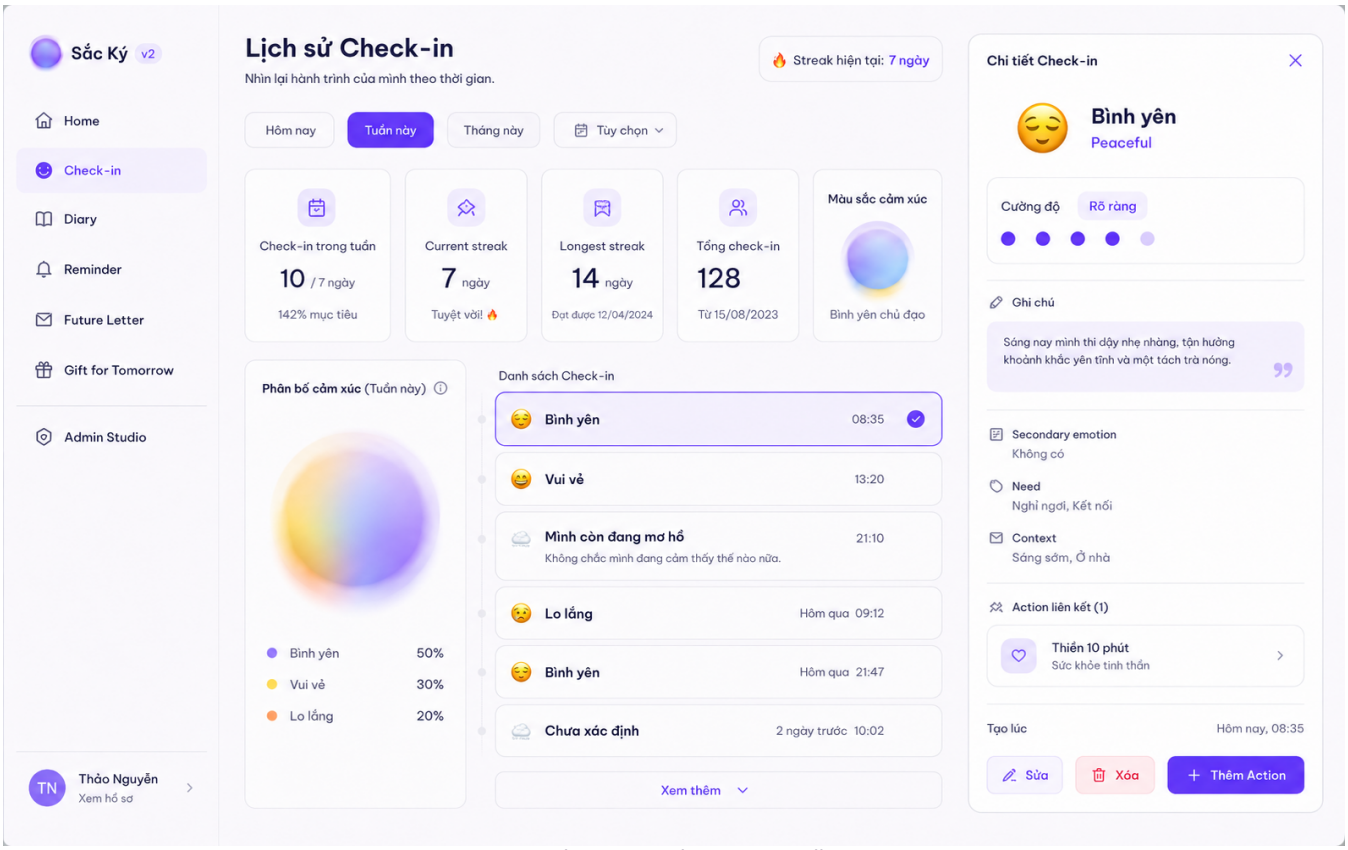

Mockup 09 — Action Modal

Implementation requirements

- Default 3 suggestions + estimated duration.
- Làm mới, Xem tất cả, custom action, date/date-range, exact time optional.
- Unsaved Check-in + Action + linkage commit nhất quán.
- Thôi không chọn quay decision context.
- Max 2 active linked Actions / Check-in.

10. History + Detail

Mockup 10 — History + Detail

Implementation requirements

- Time range đổi đồng thời metrics + Orb + list.
- Sort created_at DESC; edit không đổi created_at.
- Unknown title “Mình còn đang mơ hồ”.
- Detail dùng canonical Check-in và canonical Action.
- Delete Check-in có Action phải hỏi delete Action hay keep independent.

5. Interaction & state contract

Draft

- Autosave chỉ tạo/cập nhật draft; draft không vào History, metrics, streak hoặc Orb.
- Note/selection survive Back, Skip, prompt change, modal open/close và reload.
- Rời flow có data có thể báo “Đã lưu bản nháp”, nhưng không gọi completed.

Selection

- Selected tile giữ vị trí; không auto-reorder.
- Không silent replace khi max selection.
- State = border + tint + indicator/check + optional pigment.
- Keyboard focus visible; Enter/Space select.

Save hierarchy

- Primary Lưu -> 3-way Decision Modal.
- Quick Save -> 3-way Decision Modal.
- Review Lưu -> 2-way Decision Modal.
- Unknown Lưu -> 3-way Decision Modal.
- Commit failure không navigate Home như thể thành công.

Reflection

- Done làm Action thành Done trước; Reflection optional.
- Outcome config-driven.
- Undone không xóa reflection lịch sử.
- Done lại prefill reflection gần nhất và tạo completion cycle mới.

6. Responsive contract

- Desktop: main workspace + sticky Summary; bounded selection panel; sidebar ~212px.
- <=58rem: summary collapse thành inline/collapsible.
- <=42rem: single-column; Summary thành sticky collapsible bottom summary/bottom sheet; info affordance dùng tap.
- <=27rem: giảm padding bằng token; tiles 1–2 columns; VN/EN labels wrap.
- Không scale toàn UI bằng transform.

7. Product/data rules UI MUST NOT break

- Primary Emotion + Intensity required cho completed Emotion; Emotion Note optional.
- Unknown Note required; Unknown không có Intensity.
- Secondary max 2; Need max 3; Context max 2.
- Unknown completed tính count + streak nhưng không đóng góp Orb.
- Unknown -> Emotion giữ origin provenance.
- History sort created_at DESC; edit không đổi created_at.
- Action là canonical object; 1 Action max 1 current Check-in link; 1 Check-in max 2 active Actions.
- Home và History dùng cùng Orb aggregation capability; Emotion weighted theo intensity.
- Delete Check-in có Action không silent cascade.

8. Implementation order

- Hoàn thiện semantic token layer và map legacy variables mà không đổi Home approved visual.
- Normalize shared Button / Surface / Modal / SegmentedControl / SelectionTile / Input/Textarea.
- Build Landing -> Primary -> Decision -> Deepening -> Review -> Unknown -> Action -> History/Detail.
- Responsive pass.
- Visual regression + hosted acceptance.
- Không one-shot CSS rewrite toàn app.

9. QA / acceptance checklist

- Check-in nhìn cùng một app với approved Home.
- Canvas/ink/accent/radius/border/spacing đúng style guide; standard CTA không gradient.
- Landing có Emotion + Unknown + streak + draft resume.
- Primary có family filter + search + Recent + bounded picker + intensity + note + summary.
- Primary Lưu mở đúng 3 choices.
- Secondary/Need/Context giữ note và selected state.
- Need/Context có info affordance.
- Review jump edit trực tiếp.
- Unknown prompt change không mất note.
- Action cancel không complete Check-in.
- Selected state không chỉ dùng màu; focus visible; reduced motion respected.
- Draft không vào History/Streak/Orb; Unknown không góp Orb.
- Action same-object sync xuyên Check-in / Reminder / Home.
- Home Orb = History Orb với cùng range/data.

10. Hosted acceptance / Vercel target

- GitHub: katherine205203/SacKySpace
- Vercel project: sacky-space
- Production: https://sacky-space.vercel.app
- Supabase env: VITE_SUPABASE_URL, VITE_SUPABASE_PUBLISHABLE_KEY.
- Do not commit .env.local hoặc .vercel.

Recommended deployment sequence

```
npm install
npm run lint
npm run test
npm run build
git status
git add .
git commit -m "feat(checkin): apply Sacky v2 canonical UI system"
git push
vercel pull --yes --environment=production
vercel build --prod
vercel deploy --prebuilt --prod
```

Hosted acceptance

- Auth, Home visual regression, Landing, Emotion fast path, Deepening, Unknown.
- Action creation/cancel, History + Detail, Reminder same-object sync.
- Direct-route refresh, draft persistence, basic responsive smoke.

11. Definition of Done

- 10 visual surfaces implemented under one design system.

- Product rules Check-in v1.0 still pass.
- Home has no visual regression.
- Shared primitives reused instead of per-screen CSS duplication.
- Desktop 16:10 target reached first; responsive baseline passes.
- Lint/test/build pass.
- Hosted acceptance passes on the correct production project.
- No lost draft/note and no premature completed records.
- Production deployment healthy.
